

INFECTIOUS DISEASE QUARANTINE PROCEDURE

SELF IDENTIFIED: Student has been in contact with someone that has tested positive, suspected or known exposure to the infectious disease.

INFORMED BY CONTACT TRACER:
A contact tracer will reach out to the student if there was exposure.

STEP 1

Student calls Ashe COVID Hotline (310) 206-6217

STEP 2

Ashe Center determine by phone if the student needs an in-person visit.

STEP 3

Ashe Center assess students' condition.

STEP 4

Quarantine is needed, Ashe Center will request student to go back to their place of residence, in a private room with a private bathroom.

STEP 5

Instructions will be provided to student about quarantine protocol. Student will remain in quarantine for up to 14 days from their last contact with person who tested positive or known exposure to infectious disease.

STEP 6

Once released by Ashe Center, student returns to place of residence and resumes regular activities.

DEFINITIONS

ISOLATION separates sick people with a contagious disease from people who are not sick.

QUARANTINE separates and restricts the movement of people who were exposed to a contagious disease to see if they become sick.

– CDC 2020
